

Re: FCC Proposal to record and save all programming.
Why must you turn the industry upside down because of the irresponsibility of a few broadcasters.

Please require the offending stations to record and save all programming. That will hurt them more than a fine.

Remember, small independent broadcasters such as ourselves bear a much heavier burden when you impose regulations. We are struggling at this time to compete with huge media conglomerates and cable services that do not have to compete under the same regulations.

Penalize the Sinners.
